Shubham chandgude

Frontend Developer

I am seeking opportunities to apply and enhance skills in HTML, CSS, JavaScript and React within a dynamic team environment. I am eager to contribute to innovative projects and gain practical experience in web development through internships or full-time roles.

Projects

GEMINI CLONE
Built with React JS, this interactive app lets you chat with a clone of Google's AI, Gemini. Type your questions and receive comprehensive responses, just like you would in a conversation. This project enhanced my skills in API integration, data processing, and application development, demonstrating my ability to create robust and efficient software solutions. Add text to speak functionality (Try it) (GitHub Link)

YOUTUBE CLONE
The YouTube Clone Project is a web application designed to mimic the core functionalities of YouTube, the world's leading video-sharing platform. This project allows users to browse, search, and view videos, providing a user experience like the real YouTube platform. It serves as an excellent educational exercise for understanding how video streaming applications work, and it demonstrates the integration of various web technologies and APIs. (Try it) (GitHub Link)

BOOK STORE
This project is a web-based book store system developed using HTML, CSS, JavaScript, PHP, and MySQL. It allows users to browse available books, make purchases, manage their orders, and admins to manage inventory and orders. (GitHub Link)
